Mean trust, honest vs. malicious
(system attack; five seeds)
(a)
honest UAVs
malicious UAVs
mean trust
round
Weights under the cycling system attack
(five seeds: mean and min–max)
(b)
behavioral
computational
communication
dimension weight
round
Weights under sign-flip: convergence
to pure behavioral (cf. Thm. 2)
(c)
behavioral
computational
communication
dimension weight
round
Ablation: removing the consistency
gate collapses robustness
(d)
final accuracy
full
sym.
EWMA
no
gate
